

MISSION STATEMENT

Our mission is to provide support and education; raise awareness and appreciation, all while practicing the most ideal methods for the conservancy of this ancient landrace to ensure a stable and diverse gene pool.

AGCA will always monitor the Armenian Gampr health, identify and research any diseases or hereditary conditions and contribute to research programs benefiting the breed.

The Armenian Gampr Club of America is dedicated to continuing the advancement of the Registry Database by encouraging all owners to Register and Breeders to join the Approved Breeder Program, along with external projects such as Embark DNA, for the benefit of growing and analyzing gene pool data.

AGCA strives to preserve the Armenian Gampr as a working livestock guardian dog and also promote its multipurpose abilities.
